NODES Customer Checklist

Please fill in all questions below and send the completed list to flextools.

1. Customer information
    a. Name
    b. Site address
    c. Grid connection ID (nätanslutningID/MPID)

2. Primary contact person to coordinate installation
    a. Name
    b. Role
    c. Phone number
    d. E-mail address

3. Describe the flexible resource that will participate in NODES i.e., boiler, process equipment, etc
    a. Overview of equipment
    b. Purpose/type of resource
    c. How can the site be measured? HAN-port, sub-meters etc

4. Installed power and normal operations
    a. What is the installed power (MW) of the system/load?
    b. What is the consumption (kWh/MWh) during normal operation of the load?

5. What is the estimated flexibility potential of the system/load?
    a. Up direction (providing power to the grid) in MW
    b. Down direction (consuming power from the grid) in MW

6. How long can the load/system be disconnected?
    a. Provide a weekly schedule for time periods when load can be provide power/consume power in mFRR market?
    b. Are there any daily variations e.g., nighttime operations?
    c. Are there any seasonal variations e.g., during holidays, scheduled maintenance, etc?

7. How quickly can the load be provided or dispatched?
    a. Is there a rest period after the load has been dispatched/provided?

8. Include all technical documents such as SLD, Topology, etc

9. What is the marginal cost of the asset?
